Swiss Knife App

A project by Nico Verbruggen & Bjorn Van Acker

1 WELCOME

In order to begin, you first need to enter your real name. Then you can continue.

(Our webapp checks in localstorage whether this wizard has been run before.)

First Set-Up

Welcome! In order to get started, we first need your name. (You will be able to pick a nickname later.)

enter your name

continue

2 REGISTRATION

Our app uses a mobile connection to access our API. Now, a one-time download is required to get the lineup. If you do not want to use any other online features, a user can choose not to register.

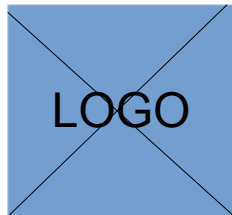

Registration

You don't have to register to use the app, but you will not be able to use online features. If you have already registered, please select *continue without registration*.

register (recommended)
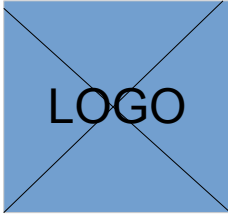

continue without registration

3 REGISTRATION, CONTINUED

The first option here is not to register. This is a great option if you do not need to connect to your friends. It is also possible to come back later.

The second option is a slightly better one: you can complete your registration and a new user account will be created for you.

Upon completion, you will be sent to the homepage!

LOGO

Registration

Are you sure you want to continue without registering?

You can always **register a new account** or **log into an existing one** by going to Account > Create.

continue without registration
